

Dear Sir,

I would like to express the importance of the KLOVE signal in our area. I am writing from a small town in New Mexico. (Carlsbad) We do not have any good quality christian radio in our area. The ones that we do have, we still support but are it is out of touch with todays new music and what is going on in the world.

The switch to a Low Powered FM station would effect this area greatly. Not only for me being a committed listener, but also to the community. I have gone to local business in my area and have heard KLOVE being played. I have heard many locals comment on the great music and impact it has had in this area.

I know that everything costs a great deal, but please take into consideration the small communities that don't have much and the station means alot to us. It would impact me and my community greatly.

I feel that KLOVE has served and met a great need in my community.

Please take the small towns into account before making this decision.

I pray God's wisdom and blessings over all of you.

Sincerely,

Michelle Navarrete
